

AMAN MANDERNA

Gurugram, Haryana, India | 9812750843 | amanmanderna98765@gmail.com | [linkedin.com/in/AmanManderna](https://www.linkedin.com/in/AmanManderna)

PROFESSIONAL SUMMARY

Data Analyst with 1+ year of experience in data analysis, data cleaning, EDA, and dashboard development using SQL, Python, Power BI, and Excel. Proven track record of automating data pipelines (reducing processing time by 75%), optimizing ETL workflows (improving efficiency by 60%), and building KPI dashboards that improved tracking accuracy by 35%. Skilled in translating large, structured datasets (100K+ rows) into actionable business insights for cross-functional and AI/ML teams.

CORE SKILLS

SQL (MySQL, SQL Server) • Python (Pandas, NumPy, Matplotlib) • Power BI (DAX, Power Query) • Tableau • Advanced Excel (Pivot Tables, VLOOKUP, Power Query) • Exploratory Data Analysis (EDA) • Data Cleaning & Preprocessing • ETL Pipeline Development • Data Modeling & Data Warehousing • Dashboard Development • KPI Tracking & Reporting Automation • Statistical Analysis • Business Intelligence • Stakeholder Communication • Data-Driven Decision Making

PROFESSIONAL EXPERIENCE

Associate Analyst — GlobalLogic

Jun 2025 – Present

- Perform exploratory data analysis (EDA) on structured datasets of 100,000+ rows using SQL and Excel, identifying data quality issues and improving overall data reliability and reporting accuracy.
- Conduct data research, cleaning, and preprocessing to maintain structured datasets, collaborating with cross-functional teams to enable data-driven insights for AI/ML projects.
- Recognized 4 times as a Key Contributor (KC) for delivering high-volume, high-quality analytical work with strong accuracy and consistency.

Data Analyst Intern — Unified Mentor

Apr 2025 – May 2025

- Performed statistical data analysis using Python to derive actionable insights from real-world, multi-domain datasets.
- Built end-to-end data analysis and visualization projects using Python and Tableau; documented methodology and findings on GitHub for reproducibility.

KEY PROJECTS

Uber Trip Analysis — Power BI & Python

- Performed EDA on 15,000+ ride records using Python and Power BI, uncovering a 40% higher demand during peak hours and identifying location-based ride concentration patterns to support operational planning.

EV Sales by State, India — Excel & Power BI

- Conducted state-wise EV sales analysis on 10,000+ data points using Excel and Power BI, uncovering regional adoption disparities with high-infrastructure states showing 2x higher adoption rates.
- Delivered data visualizations highlighting 30%+ growth in EV sales within incentive-driven states, supporting data-driven market expansion strategy recommendations.

LinkedIn Job Market Analytics — Power BI & Python

- Scraped and analyzed 5,000+ LinkedIn job postings using Python (Pandas, NumPy) to uncover skill demand trends, salary distributions, and top hiring locations across 10+ industries.
- Engineered a KPI-driven Power BI dashboard with 5+ interactive visuals enabling drill-down analysis by role, location, and skill, surfacing actionable insights for job seekers.

EDUCATION

Master of Computer Applications (MCA) | Chandigarh University(CU)

2023 – 2025

CGPA: 7.51

Diploma in Computer Applications (DCA) | Maharshi Dayanand University(MDU)

2022 – 2023

Score: 76%

CERTIFICATIONS

- Introduction to Data Analytics — IBM
- Excel Basics for Data Analysis — Coursera
- Data Visualization and Dashboards with Excel and Cognos — IBM
